CORE SKILLS

- Project Management
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

TECH SKILLS

- HTML, CSS, JavaScript
- React (basic), DOM Manipulation
- Local Storage, Basic REST concepts
- AI Projects (Umpire-AI, Chatbot logic)
- No-code & low code
- Git & GitHub
- Figma
- Python

LANGUAGES

- English
- Hindi
- German (Basic)

PROFILE

Motivated software developer with hands-on experience in building real-world web applications using HTML, CSS, JavaScript, Python, and Java. Strong interest in Generative AI and no-code platforms. Quick learner with practical exposure through hackathons and project-based learning. Focused on writing clean code, solving real problems, and continuously improving technical skills

EDUCATION

Higher Secondary Education (HSC)	2022 - 2024
St. Xavier's Hight school & Jr.College	
Secondary School Certificate	2012 - 2022
MES VIDYA MANDIR	

PROJECTS

FreelancerFlow

Built a freelance workflow web app with project tracking, clean UI, and dynamic JavaScript logic focused on real-world user flows.

New Chatting App

Developed a chat application with real-time messaging using JavaScript, handling events, state updates, and responsive UI.

Umpire-AI

AI-themed project simulating an umpire system using basic computer-vision or rule-based logic, showing applied AI interest

Gym Management System

Built a web interface to manage gym members, schedules, and activities using HTML, CSS, and JavaScript.

Student-Teacher Booking System

Created a website where students can book sessions with teachers using HTML, CSS, and JavaScript.

ACHIEVEMENTS & HACKATHONS

Actively participated in multiple hackathons focused on AI, ML, and web development.

Worked on AI/ML experiments including YOLO object detection and Google QuickDraw demos

Regularly engaged in tech communities, hackathons, and developer forums
